Profile Summary

GRC & Cyber Compliance | **OT / ICS Security** | **Information Security Governance**

Total Experience – **2.6 Years** | Current Location – **Delhi NCR, India** | Preferred Location – **Delhi NCR, India**

GRC and cybersecurity compliance professional with **2.6 years** of experience in **OT/ICS engineering** and government funded security research, contributing to a **MeitY national project** on IT Act 2000 (Section 79A) with exposure to **CERT-In** coordination, audit readiness, and multi-stakeholder governance.

Technical Skills

GRC & Compliance: ISO/IEC 27001, ISO/IEC 27037, ISO/IEC 17025, IT Act 2000 (Sec. 79A), CERT-In Guidelines, NIST CSF (awareness)

OT / ICS: SCADA Systems, RTU Software Stacks, Industrial MQTT (SIRIUS), OT Network Architecture, IEC 62443 (awareness)

Documentation: Compliance SOPs, Gap Assessment Reports, Audit Evidence, Policy Frameworks, Technical Design Documents

Languages & Dev: C++17, Python, SQL, Git, GTest

Tools: MS Office Suite, GEM Portal, Git, Bitbucket

Professional Experience

University of Delhi | Department of Computer Science

December 2025 – Present

Research Engineer | *MeitY-Funded Project*

Delhi, India

- Working on a **Ministry of Electronics & IT (MeitY)**-funded research project on “*Automation of Assessment for Section 79A of IT Act, 2000*”, establishing national standards for Examiners of Electronic Evidence.
- Gained working knowledge of **ISO/IEC 17025** (laboratory competence) and **ISO/IEC 27037** (digital evidence handling) through hands-on project implementation, applying both standards to assess forensic laboratory compliance across India.
- Conducted **training programs** for law enforcement agencies and police cyber cells on digital evidence handling, chain of custody, and cyber law compliance.
- Documented security assessment procedures and technical standards for electronic evidence examination, contributing to **national-level policy frameworks**.
- Managed end-to-end **project governance** including budget tracking, vendor procurement (GEM portal), utilization certificate preparation, and formal correspondence with MeitY and Finance Branch.
- Acted as primary liaison across **4 key stakeholder groups** – PI, MeitY Coordinator (Scientist F), Finance Branch, and law enforcement agencies – coordinating fund releases, audit readiness, and regulatory submissions.

Synergy Systems & Solutions

June 2024 – September 2025

Software Engineer

Delhi NCR, India

- Designed and implemented the **DAE** (Data Acquisition and Alarms & Events) module by consolidating legacy **AEP** and **PDU** modules, delivering **40%** performance improvement and significantly reducing system complexity.
- Developed key features including **GRO** (Generate Roll Over) for database table management, **Test Mode**, and **Questionable Flag** mechanisms, strengthening data validation and fault detection processes.
- Integrated ExtremeDB View API to optimize data access patterns, resulting in **25%** faster query responses and improved overall system efficiency.
- Architected and built the **LSA** (Load Shed Application) module with a **JSON** configuration parser, automated database population system, and robust error handling framework, resulting in up to **60%** improvement in module performance and reliability.
- Resolved **15+** production critical issues through debugging, simulation, and root cause analysis, ensuring zero downtime deployments and stable production releases.
- Collaborated cross-functionally to troubleshoot and enhance the **SIRIUS MQTT** module, performing data integrity analysis, system simulations, and implementing permanent fixes for field reported defects.
- Designed a multi level reference architecture for the **SIRIUS MQTT**, enabling chained table queries (**2–5 levels deep**) with caching mechanisms for faster retrieval and scalability.
- Implemented comprehensive software licensing solution using SoftActivate SDK, including license key generation, validation, and activation server configuration for the **SIRIUSx64** application.
- Authored detailed technical design documents outlining data structures, implementation phases, and performance optimization strategies to ensure maintainable and high quality software delivery.
- Utilized **GTest** framework to conduct unit and integration testing and maintained strict version control practices using **Git** and **Bitbucket**, ensuring smooth collaboration and reliable build management within **Agile** workflows.

Synergy Systems & Solutions

December 2023 – June 2024

Software Engineering Intern

Delhi NCR, India

- Migrated four legacy **SCADA** modules (**PSM**, **SSDDL**, **AEP**, **PDU**) from **C++98** to **C++17**, upgrading build environment from **Visual Studio 2008** to **2022**.
- Replaced database interface with **ExtremeDB**, ensuring system compatibility and performance.
- Delivered clean, modernized code with **zero** build warnings, improving long term maintainability.
- Gained hands on experience with industrial systems, **SCADA protocols**, and real time **RTU software stacks**.

Education

Department of Computer Science, University of Delhi

2022 – 2024

Master of Science in Computer Science

7.69/10 CGPA

Ramanujan College, University of Delhi

2019 – 2022

Bachelor of Science (Hons.) in Computer Science

9.04/10 CGPA
